							Ship Structural Design	Low Sulphur Fuel - Basics and Experience						
							Design for Production							
							IMO PSPC – Content and Technical Background for Shipping Companies and Ship Yards							
						Extended Dry Docking								

- Basic modules** are designed for new personnel or laterally hired personnel who have no prior knowledge of a subject and who want to have a general introduction to it. They will receive basic knowledge and gain a first insight into the subject.
- Advanced modules** are for those who already have knowledge and experience in the respective field. Advanced courses impart relevant and up-to-date knowledge but take into account the participants' existing knowledge.
- Advanced plus modules** are generally recognised, certified courses or seminars which follow legal guidelines or recommendations.
